FEEDING INSTRUCTIONS

Feed BOVA MAX CALF 28 AF-MOS TUB free-choice to cattle on all types of roughages. Feed one tub per 20 head of cattle. Feed the tubs continuously. Cattle should consume approximately 1 to 1.5 pounds per head per day. If cattle consume more or less than the desired amount, reposition the tubs to achieve the proper consumption. Provide a continuous supply of clean, fresh water and all the roughage the cattle will eat. Factors affecting consumption are variations in forage quality and availability of such forages. In addition, the nutritional needs of the cattle must be balanced. After initial adjustment period of 7 to 10 days from tub introduction, average consumption should be 1 to 1.5 pounds per head per day with consistent forage.
