

# FURST STEP™ 20/20

## MOS MILK REPLACER

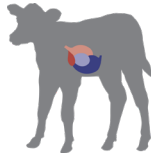

An excellent choice for getting calves off to a healthy start while controlling cost. FURST STEP 20/20 MOS is a non-medicated 20% all-milk protein and 20% edible-grade fat milk replacer, formulated to meet the complete nutritional needs of nursing calves. This mildly-acidified milk replacer is well fortified with macro and micro trace minerals, vitamins and MOS. To enhance digestibility and gut health, consult your McNess sales representative to pair FURST STEP 20/20 MOS with the ideal starter for best results.

### THE FURST STEP TO:

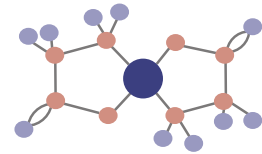

#### Building Consistent Results

FURST STEP 20/20 MOS is consistent in quality, digestibility, aroma and flavor to provide uniform results.

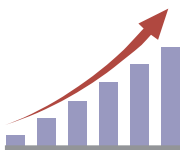

#### Support Gut Health

FURST STEP 20/20 MOS contains a unique combination of ingredients to support digestion, product stability and a healthy microflora balance.

#### Immune Support

FURST STEP 20/20 MOS has the optimum balance and bioavailability of minerals, vitamins and prebiotics to support the immune system.

#### Lean Structural Growth

FURST STEP 20/20 MOS supports tissue growth, structural development and a robust metabolism.

**APPROVED**

#### Permissible for Non-Medicated Operations

FURST STEP 20/20 MOS is designed for production systems that do not allow the use of ionophores or drugs in the feed.

#### Pathogen Defense

FURST STEP 20/20 MOS contains multiple functional ingredients for the prevention of scours and respiratory illness.
