

FURST STEP™ 22/20

B-MOS-DFB (CLARIFLY®) MILK REPLACER

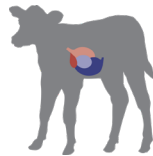

A great choice for getting calves off to a solid start over traditional milk feeding programs. FURST STEP 22/20 B-MOS with Clarifly® is a medicated 22% all-milk protein and 20% edible-grade fat milk replacer, formulated to meet the complete nutritional needs of nursing calves. Bovatec® is added for protection to control coccidiosis. It is mildly-acidified and well-fortified with macro and chelated trace minerals, vitamins and MOS to enhance digestibility, growth and gut health. Consult your McNess sales representative to pair the best suited starter with this milk replacer to meet the goals of your operation.

THE FURST STEP TO:

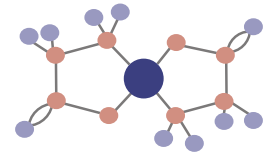

Building Consistent Results

FURST STEP 22/20 B-MOS is consistent in quality, digestibility, aroma and flavor to provide uniform results.

Support Gut Health

FURST STEP 22/20 B-MOS contains a unique combination of ingredients to support digestion, product stability and a healthy microflora balance.

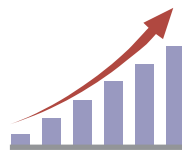

Immune Support

FURST STEP 22/20 B-MOS has the optimum balance and bioavailability of minerals, vitamins and prebiotics to support the immune system.

Fly Control

FURST STEP 22/20 B-MOS includes a larvicide, ClariFly®, to aid in prevention of flies from developing in and emerging from the manure, where flies lay their eggs.

Lean Structural Growth

FURST STEP 22/20 B-MOS has extra protein, compared to traditional programs, to support added tissue growth and structural development and a robust metabolism.

Pathogen Defense

FURST STEP 22/20 B-MOS contains ingredients for the prevention of scours, respiratory illness and coccidiosis caused by *Eimeria bovis* and *Eimeria zuernii*.

FURST STEP™ 22/20
