

TOTAL CALF™ STARTERS

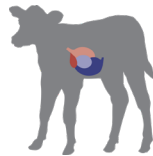

18%, 20%, 22% AND 24% PROTEIN CALF STARTERS

TOTAL CALF™ Starters offer a flexible range of highly digestible proteins and carbohydrate sources designed to get calves off to the best possible start based on your individual needs and goals. TOTAL CALF™ Starters are formulated to balance the nutrient requirements of growing calves as their diet shifts from primarily liquid milk to a completely dry starter at weaning. Care is taken to balance lean growth, calf health, rumen development and cost of gain throughout the starting period. Focusing on the whole calf by using TOTAL CALF™ Starters sets calves up for successful weaning, prevents post-weaning lags and helps to meet your targeted growth goals.

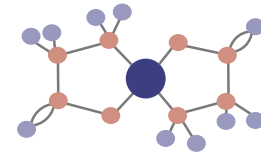

Custom to Your Feeding Program

TOTAL CALF™ Starters offer flexibility to choose protein levels that will deliver the best results based on birth weights, target growth weights, weaning age and environment.

Supports Gut Health and Rumen Development

TOTAL CALF™ Starters promote friendly microflora populations to enhance and support rumen development. They encourage intake and excellent gastrointestinal function.

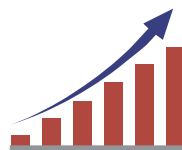

Immune Support

TOTAL CALF™ Starters have the optimum balance of bioavailable minerals, MOS and yeast metabolites, to support the immune function and calf health.

Fly Control

TOTAL CALF™ Starters have the option to include a larvicide, ClariFly®, to aid in prevention of flies from developing in and emerging from the manure, where flies lay their eggs.

Efficient Structural Growth

TOTAL CALF™ Starters have balanced and digestible protein and carbohydrate ingredients for developing a sound frame and continued future growth.

Pathogen Defense

TOTAL CALF™ Starters contains ingredients for the prevention of scours, respiratory illness and coccidiosis caused by *Eimeria bovis* and *Eimeria zuernii*.

TOTAL CALF™ STARTERS

18%, 20%, 22% AND 24% PROTEIN CALF STARTERS

FEATURES

- 38% Total Calf Concentrate is Available for On-Farm Mixing
- Rumensin®
- Ideal Protein-to-Energy Ratio
- Optimal Levels of Macro and Chelated Trace Minerals
- Prebiotic Ingredients
- Proven Yeast Fermentation Metabolites
- Flaked or Cracked Corn and Clean Whole Oat Options
- Fly Control (ClariFly®) added Seasonally
- 50 lb Bags or Bulk (ability to customize on orders over two tons, including non-medicated, natural, organic, etc.)

18% TOTAL CALF™ STARTER
Product Code: 2110
Fly Control Code: B2110

20% TOTAL CALF™ STARTER
Product Code: 2105
Fly Control Code: B2105

22% TOTAL CALF™ STARTER
Product Code: 2100
Fly Control Code: B2100

24% TOTAL CALF™ STARTER
Product Code: 2108
Fly Control Code: B2108
