

Bova Beef Mineral 6 - Altosid®

Product Profile

Control the horn fly population attacking your herd

Key Benefits

- Contains Altosid® IGR (Insect Growth Regulator)
- Prevents adult horn flies from emerging from manure of treated cattle
- Provides high levels of trace minerals and vitamins
- Reduces breeding and cleaning problems
- Builds healthy immune systems in both cows and calves
- Safe for all cattle and the environment

Product Description

- A mineral designed to be used on grass and mixed legume grass-based forages.
- Includes Altosid®, which helps:
 - Keep condition on cows by reducing stress and activity associated with biting flies
 - Improve weaning weights - research indicates calves wean 10-25 pounds heavier when fly control is successful

Packaging & Form

- 50 pound bag

Feeding Directions

- Feed this product to cattle only.
- When used as directed, McNess Bova-Beef Mineral 6-Altosid® will provide sufficient S-methoprene insect growth regulator to prevent the emergence of adult horn flies from manure treated cattle. Existing adult horn flies will not be affected.
- Start feeding before horn flies appear and continue use until cold weather marks the end of the horn fly season.
- Allow free choice to cattle.
- Cattle should consume an average of 0.286 ounces per 100 pounds of cattle body weight per day, which is equivalent to 4 ounces per day for a 1,400 pound cow.
