

# Bova-Min Minerals Product Profile

Optimize health and productivity of pasture cattle

## Key Benefits

- Provides high levels of available trace minerals and vitamins
- Reduces breeding and cleaning problems
- Improves the health and productivity of beef cattle
- Complements nutrients found in co-products (2-T)
- Helps prevent nervous disorders when feeding co-products through the addition of Thiamine (2-T)
- Reduces external parasites by including essential oils (6-Fly) [This is from customer observations and not a claim by the manufacturer]

## Product Description

- Specially-formulated products made to be palatable for consistent consumption on pasture
- Designed to be fed straight from the bag
- Available in multiple formulations to meet various nutritional needs

## Packaging & Form

- 50 pound bag

## Available Formulations

All the Bova-Min line products contain the same levels of vitamins and trace minerals.

### • Bova-Min 6

For use with grass-based forages and can be used as a year-round mineral in many areas

### • Bova-Min 9

For use on mixed legume grass-based forages; contains an intermediate level of Phosphorus

### • Bova-Min 12

For use in areas that have low phosphorus levels in the soil; contains the highest level of Phosphorus in the product line

### • Bova-Min 2-T

For use with cattle on pasture being fed corn co-products; contains Thiamine

### • Bova-Min 6-Fly

For use with grass-based forages and can be used as a year-round mineral in many areas; contains essential oils
