

COMMODITY NUTRIENT PROFILE

Corn Germ Meal

DESCRIPTION

Corn Germ Meal is the by-product of oil extraction from corn germ obtained from corn processing. It is a mid-range protein and energy ingredient suitable for all classes of livestock.

USE AND APPLICATION

Corn Germ Meal is an excellent source of protein and fiber for cattle, swine and poultry and provides a good balance of amino acids and essential nutrients. Corn Germ Meal use in companion animal feed is complementary to other ingredients in these diets.

STORAGE AND HANDLING

Corn Germ Meal is available as a free-flowing meal. The product is light brown in color with a medium coarse meal texture. It can be handled in most bulk material handling systems.
