

# Furst Boost™

(oral drench)

## Product Profile

Give every pig a fighting chance.

*Nutritional support for newborn, fall back and at-risk piglets.*

### Key Benefits

- Nutritionally supports piglets with scours in health-challenged situations
- Highly effective for rescuing fall back pigs
- Can be used as a nutritional supplement when quality colostrum is limited.
- Supports health, milk intake and nutrient absorption
- Promotes:
  - Livability
  - Number of full-value pigs weaned
  - Greater weaning weight
  - Uniformity in weight of weaned pigs
- Supports gut health

### Product Description

- An oral drench consisting of a unique and proprietary combination of probiotic bacteria, concentrated yeast-based fermentation extract, micronutrients, pathogen-specific spray-dried polyclonal egg antibodies, organic acids and botanical extracts.

### Label Indications & Mixing Directions

- No label restrictions
- 1 dose equals one 2 ml pump
- Standard usage:
  - Supplement all piglets 12 to 36 hours after birth with one dose. Repeat after 24 hours as needed.
- Use with large litters:
  - Give to the smallest 1/3 of piglets as nutritional support. Repeat after 24 hours as needed.
- Use during health challenges:
  - Give one dose to pigs in fall back pens in nurseries and wean-to-finish barns. Repeat after 24 hours as needed.

### Packaging

- 6 – 16 ounce bottles (1,200 doses) with 2 – 2 ml pump
- 12 – 8 ounce bottles (1,200 doses) with 12 – 2 ml pumps

### Product Formulation

- Thick, brownish liquid with a strong aroma

### Regulatory Status

- Natural feed supplement that uses only AAFCO-approved ingredients
- No Veterinary Feed Directive (VFD) required
- Not for human consumption

### Storage & Handling

- Store in a cool, dry place
- Shake well before use
- Avoid contact with skin and eyes
- Avoid freezing

Note: Always review Safety Data Sheet (SDS) prior to handling.

Product Codes:

**FMC400**

6 - 16 oz bottles + 2 drenchers

**FMC420**

12 - 8 oz bottles + 12 drenchers

## Step 1

Inspect bottles to ensure all are intact.

## Step 2

Store in a cool, dry place. Keep out of reach of children.

## Step 3

Prior to use, put on appropriate Personal Protective Equipment (PPE), which may include, but not limited to:

- Eye/face protection
  - Safety glasses or chemical goggles
- Skin protection

Note: Review the Safety Data Sheet (SDS) before product use

## Step 4

Determine which piglets will receive Furst Boost™.

- Shake well before use
- Properly secure and support the piglet
- Properly place the dosing tip in the piglet's mouth at the side of the cheek
  - Do not apply directly into the piglet's throat to avoid accidental aspiration into the piglet's respiratory tract
- Proceed to gently depress the plunger and completely dispense the full dose of Furst Boost™
- Dosage:
  - 1 dose = one 2ml pump
  - Standard Usage: Administer 1 dose 12 to 36 hours after birth. Repeat with 2nd dose 24 hours later as needed.
  - Large litters: Administer 1 dose to the smallest 1/3 of the piglets. Repeat with 2nd dose 24 hours later as needed.
  - Health challenges: Administer 1 dose to pigs in fall back pens in nurseries and wean-to-finish barns. Repeat with 2nd dose 24 hours later as needed.
