FURST FORCE™ CALF

A 6-IN-1 NUTRITIONAL SUPPLEMENT

SUPPORT YOUR CALVES DURING STRESSFUL SITUATIONS

Weather, socialization, dystocia, colostrum and milk intake, environmental pathogens can all create issues for calves less able to withstand such challenges.

FURST FORCE™ CALF is a unique oral drench for newborn calves utilizing a complex blend of nutritional technologies designed to support the animal, while providing the gastro-intestinal support calves need, especially those at-risk.

FURST FORCE™ CALF delivers:

1. Three specific strains of probiotic bacteria (*B.pumilus*, *B.subtilis* and *B.licheniformis*) with a concentrated yeast-based fermentation extract that contains many micro-nutrients to **support gut health**.
2. A specific blend of spray dried egg powder that is a source of polyclonal egg antibodies to **support health and immunity**.
3. Specific organic acids to **support digestion** as well as product stability.
4. Beta Glucans and MOS for **added health benefits**.
5. Vegetable fat as an **added energy source**.
6. Key botanical extracts, essential oils and flavorings to **support health, immunity and stimulate suckling**.
