

Total Calf™ Starter Product Profile

Set calves up for a successful weaning

Key Benefits

- Helps prevent scours, respiratory illness and coccidiosis caused by *Eimeria bovis* and *Eimeria zuernii*
- Provides ideal protein-to-energy ratio
- Supports immune function and calf health
- Enhances and supports rumen development
- Helps control fly population (ClariFly®)
- Balances lean growth, calf health, rumen development and cost of gain

Product Description

- Offers a flexible range of highly-digestible proteins and carbohydrate sources designed to get calves off to the best start possible based on individual needs and goals
- Formulated to balance the nutrient requirements of growing calves as their diets shift from primarily liquid to completely dry starter at weaning
- Contains select yeast fermentation metabolites to support immune function and calf health
- Allows flaked or rolled corn and clean whole oat options
- Customizable to fit individual dairy needs

Packaging & Form

- 50 pound bags or bulk
- Ability to customize on orders over 2 tons, including Deccox®, non-medicated, natural, organic, etc.

Product Codes:

- 2108** 24% Total Calf-R40
- 2100** 22% Total Calf-R40
- 2105** 20% Total Calf-R40
- 2244** 18% Dairy Calf-R35
- 2110** 18% Total Calf-R40
- 2115** 16% Total Calf-R30

Feeding Guidelines

- Hand feed continuously to calves to provide
0.14 to 1.0 mgs Monensin per pound body weight per day
- Offer Calf Starter products at 3 to 4 days of age
- Provide fresh starter daily
- Provide fresh, clean water to calves at all times
- Calves should be eating a minimum of 2 pounds of starter for
3 consecutive days before weaning
- Do not change grain ration during periods of stress such as weaning,
dehorning or regrouping
