

COMMODITY NUTRIENT PROFILE

RICE HULLS

DESCRIPTION

Rice Hulls consist primarily of the outer covering of rice obtained during the regular milling of edible rice.

USE AND APPLICATION

The digestibility of the fiber in Rice Hulls is limited; therefore, it is well suited as a bedding material. Rice Hulls can be used in feeds that allow high fiber levels or as a carrier for minerals, vitamins or other micro ingredients.

STORAGE AND HANDLING

Rice Hulls are available in bulk and as such stored in traditional bulk bins and handled accordingly. Rice Hulls may be stored on a cement slab or in a commodity bay (covered and protected from the weather).
